

245 First Street Cambridge, MA 02142 (Entrance at 1 Athenaeum Street)

**A dental study by The Forsyth Institute Clinical Research Center  
in collaboration with ForsythKids Program**

**Do you want to brush your teeth  
and help us learn more about how  
to keep them healthy?**

**We are looking for children ages 10-14  
years with previous tooth decay experience  
to take part in a clinical study testing an  
investigational toothpaste for prevention of  
new tooth decay**

If your child is found eligible and willing to participate, your child:

- Will receive toothpaste and toothbrush with instructions of use.
- Will be seen every 3 months up to 12 months for repeated exams, which only takes up to 30-45 minutes each.
- Up to \$400 stipend available for travel and time
- The regular visits to your child's dentists for teeth cleaning or treatments (except braces) can continue during study participation
- Participation is voluntary; if you decide not to participate, your child's regular dental care or treatment will not be affected.

**If you are interested, please call or email for more information:**

617-892-8499 or 617-892-8213
